

LAN-OAK PARK DISTRICT

# LIVING TREE MEMORIAL

Honor that person, event, or organization with a living honor...

To honor or remember a person in your life all you need to do is purchase a tree from the list of approved trees and the LOPD will plant that tree in the park of your choice. The fee paid includes the purchase of the tree, planting, and care of the tree. As the purchaser you receive a copy of the certificate that will be sent to the individual/family stating that a tree was planted in their honor and/or memory. Also, the name of the person you are remembering or honoring will be engraved on the Tree Memorial Plaque that is displayed at the Eisenhower Fitness & Community Center. After the tree has been planted, we will notify you of the location of the tree along with a picture.

Trees are planted two times a year  
***Spring***-(April/May) and ***Fall***-(September/October).

## **Information on the Approved Trees**

### **Royal Red Norway Maple**

At maturity, the tree will reach a height of 40'-50', a spread of 35'-45'. A vigorous tree, straight trunk, well shaped head.

### **Red Sunset Maple**

At maturity, the tree will reach a height of 45'-50', a spread of 35'-40'. Good branch angles, bright red fall colors

### **Green Mountain Sugar Maple**

At maturity, the tree will reach a height of 70', a spread of 45'. Upright oval crown, heat tolerant.

### **Autumn Blaze Maple**

At maturity, the tree will reach a height of 50', spread of 40'. Dense, rounded, oval head with ascending branch structure and central leader, rapid growing. Excellent orange-red fall color persisting later than many others; drought tolerant. A cross between red maple and silver maple with the best features of each.

### **Sunburst Honeylocust**

At maturity the tree will reach a height of 30'-45', a spread of 20'-25'. Broad, pyramidal form. Medium growth rate. Yellow fall color. Seedless and thornless.

### **Bur Oak**

At maturity, the tree will reach a height of 70'-80', a spread of 70'-80'. Native Illinois tree that makes a magnificent specimen. Dark tree leaves, corky branches. Tolerates a variety of soil types, drought and pollution.

### **Northern Red Oak**

At maturity, the tree will reach a height of 60'-75', a spread of 60'-75'. Round topped and symmetrical; fast growing. Very large, shapely lobed, dark green leaves turned beautiful red in autumn. Essentially disease and insect free.

### **Northern Pin Oak**

At maturity, the tree will reach a height of 60'-70', a spread of 25'-40'. Strongly pyramidal, distinctive growth habit; moderate to fast growth rate. Popular shade tree.

**Greenspire Linden**

At maturity, the tree will reach a height of 40', a spread of 30'. Tight, well-formed pyramidal shape with dense branching habit. Distinctive small foliage. Good for difficult conditions.

**American Sentry Linden**

At maturity, the tree will reach a height of 60'-80', a spread of 30'-50'. Stately, with numerous low-hung, spreading branches forming oblong crown. Fragrant, pale yellow flowers; good for large areas.

**Ivory Silk Japanese Tree Lilac**

At maturity, the tree will reach a height of 20', a spread of 15'. The tree will be a vase shape growing into a compact rounded tree. Fragrant, cream white panicle flowers, with dark green leaves.

**Colorado Green Spruce**

At maturity, the tree will reach a height of 40'-60', a spread of 20'-30'. Adaptable to hot, dry conditions. Dense pyramidal form with foliage that varies from light green to blue-green.

**Norway Spruce**

At maturity the tree will reach a height of 40'-60', a spread of 25'-30'. Medium to fast growth rate when young. Pyramidal and stiff when young, but graceful at maturity. Excellent for screen or windbreak. Bright green when young, changing to lustrous dark green at maturity.
